

	Rating
Rating Formula for Eating Disorders:	
Self-induced weight loss to less than 80 percent of expected minimum weight, with incapacitating episodes of at least six weeks total duration per year, and requiring hospitalization more than twice a year for parenteral nutrition or tube feeding	100
Self-induced weight loss to less than 85 percent of expected minimum weight with incapacitating episodes of six or more weeks total duration per year	60
Self-induced weight loss to less than 85 percent of expected minimum weight with incapacitating episodes of more than two but less than six weeks total duration per year	30
Binge eating followed by self-induced vomiting or other measures to prevent weight gain, or resistance to weight gain even when below expected minimum weight, with diagnosis of an eating disorder and incapacitating episodes of up to two weeks total duration per year	10
Binge eating followed by self-induced vomiting or other measures to prevent weight gain, or resistance to weight gain even when below expected minimum weight, with diagnosis of an eating disorder but without incapacitating episodes	0

NOTE: An incapacitating episode is a period during which bed rest and treatment by a physician are required.

DENTAL AND ORAL CONDITIONS

§ 4.149 [Reserved]

§ 4.150 Schedule of ratings—dental and oral conditions.

	Rating		Rating
9900 Maxilla or mandible, chronic osteomyelitis or osteoradionecrosis of:		Not involving loss of temporomandibular articulation	
Rate as osteomyelitis, chronic under diagnostic code 5000.		Bilateral	30
9901 Mandible, loss of, complete, between angles	100	Unilateral	20
9902 Mandible, loss of approximately one-half:		9907 Ramus, loss of less than one-half the substance of, not involving loss of continuity:	
Involving temporomandibular articulation	50	Bilateral	20
Not involving temporomandibular articulation	30	Unilateral	10
9903 Mandible, nonunion of:		9908 Condylod process, loss of, one or both sides	30
Severe	30	9909 Coronoid process, loss of:	
Moderate	10	Bilateral	20
NOTE—Dependent upon degree of motion and relative loss of masticatory function.		Unilateral	10
9904 Mandible, malunion of:		9911 Hard palate, loss of half or more:	
Severe displacement	20	Not replaceable by prosthesis	30
Moderate displacement	10	Replaceable by prosthesis	10
Slight displacement	0	9912 Hard palate, loss of less than half of:	
NOTE—Dependent upon degree of motion and relative loss of masticatory function.		Not replaceable by prosthesis	20
9905 Temporomandibular articulation, limited motion of:		Replaceable by prosthesis	0
Inter-incisal range:		9913 Teeth, loss of, due to loss of substance of body of maxilla or mandible without loss of continuity:	
0 to 10 mm	40	Where the lost masticatory surface cannot be restored by suitable prosthesis:	
11 to 20 mm	30	Loss of all teeth	40
21 to 30 mm	20	Loss of all upper teeth	30
31 to 40 mm	10	Loss of all lower teeth	30
Range of lateral excursion:		All upper and lower posterior teeth missing	20
0 to 4 mm	10	All upper and lower anterior teeth missing ...	20
NOTE—Ratings for limited inter-incisal movement shall not be combined with ratings for limited lateral excursion.		All upper anterior teeth missing	10
9906 Ramus, loss of whole or part of:		All lower anterior teeth missing	10
Involving loss of temporomandibular articulation		All upper and lower teeth on one side missing	10
Bilateral	50	Where the loss of masticatory surface can be restored by suitable prosthesis	0
Unilateral	30	NOTE—These ratings apply only to bone loss through trauma or disease such as osteomyelitis, and not to the loss of the alveolar process as a result of periodontal disease, since such loss is not considered disabling.	
		9914 Maxilla, loss of more than half:	
		Not replaceable by prosthesis	100
		Replaceable by prosthesis	50
		9915 Maxilla, loss of half or less:
